

Hornet Air Horn Emergency Station Kit

- **121 Decibels Loud!**
- **Rechargeable Lithium-Ion Battery**
- **Reliable In Temperature Extremes**

Emergency stations have evolved from using unreliable disposable air horns to state-of-the-art, highly reliable rechargeable electric air horns. Identical sound. Identical loudness (until the disposables fail), but with superior performance in a setting where sounding the alarm can save lives.

Instantly Know the Charge State of Your Air Horn

Using our optional battery charge meter that plugs into the charge port, it takes seconds to check. A tremendous time savings.

Extreme Heat? Extreme Cold? No Problem

The Hornet air horn works reliably when needed.

Charge Once a Year

The rechargeable lithium-ion battery packs plenty of power so that you can easily go a year between charges.

No Longer a Consumable Item

No matter how much you use it, the Hornet air horn will work reliably for years. Simply recharge it as needed.

Horn Specifications:

Maximum Sound Volume: 121 Decibels

Battery: 14.4 Volt Lithium-Ion Rechargeable

Battery Duration: 35 Minutes per Charge

Battery Life: 500 Charges

Height: 8.75" (22.2 cm)

Length: 6.75" (17.1 cm)

Width: 3.25" (8.3 cm)

Battery Charge Meter: Part HNT-MTR

About WoodsCan Industries Inc.

WoodsCan Industries Inc., based in Victoria, BC, Canada, manufactures the finest rechargeable electric air horns in the world.

WoodsCan's value proposition is based on the improved performance, safety and reliability of our air horns vs. buying disposable compressed gas air horn refills. Being rechargeable allows for the recovery of the initial cost within a few weeks of purchase, with even greater savings thereafter.

Companies typically offer solutions that are either less expensive or environmentally friendly, and a consumer is invariably faced with having to choose one or the other. WoodsCan's patented solution to safety signaling air horns eliminates this dilemma - users have a safe, reliable product that is both cost-effective and more environmentally friendly than conventional alternatives.

Regardless of your application, the Hornet Air Horn Emergency Station will exceed your expectations.

- Construction Safety (Indoor/Outdoor)
- Factories and Mills ▪ Outdoor Work Yards
- Emergency Stations ▪ Tornado Warning
- Marine (ships)

Each kit includes:

- WoodsCan Hornet air horn with a rechargeable lithium-Ion battery ▪ Battery charger ▪ Safety bar to keep the Hornet in place while the door is open
- "Air Horn" sign brings attention to the kit
 - Waterproof, dust proof, protective hard case that can be wall mounted (case pre-drilled for mounting)
 - Mounting hardware.

NOTE: Battery Charge Meter is a separate accessory as only one is needed for many emergency stations. Part number: HNT-MTR.

We also have a specific **Industrial Safety Air Horn Kit** extensively used by drilling & blasting crews, as well as a **Railway Safety Air Horn Kit** used by track maintenance and rail yard crews. Please contact one of our resellers listed on our website or contact us directly to learn more.
